

Come
Hell
or
High
Water ...

Madison Park Productions
will keep the faders flying,
the hard drives humming and
the reels rolling. | | | | | | | |

We did survive the tragic Flood of '97 and we resurfaced unscathed without missing a beat of production. As you can see, Longworth Hall wasn't functional for 9 full days, but we didn't let Old Man River stop us. 45 minutes after the evacuation notice was delivered, we loaded a few tape machines, microphones and a computer onto Noah's Ark. We headed to higher ground in Covington, Kentucky where we set up and continued production, business as usual.

We want to thank our customers. The support and shelter offers were great. We also want to encourage those of you who haven't visited us lately to give us a call. We've been busy turning out some great work with new gear and a flexible, can do attitude. Whether you need a voice over, custom music, a digital ISDN patch, audio sweetening, remote recording or tape duplication, we're here to help. "Get out of the box" and call Madison Park Productions, because come Hell or High Water, we'll be more than ready to meet your needs and exceed your expectations.
